Just try to share evenly. Though I wanted to see at some cases to see if they would accept less.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 3

I was trying to be fair. At first I didn't know what was going on.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 4

I first accepted all offers. I then became more selective and just accepted 4 or 5 coins.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 5

I tried to make sure the decisions were fair so that we both ended up with the same amount of coins.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 6

I understood that I was at the other players mercy but was prepared punish them if they offered anything less than 4 coins. The other person seemed keen on taking advantage of my generosity, though.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 7

At first I just wanted to see what the lowest acceptable offer would be, and if it was consistently accepted. I did play around with giving more one round and then less than the acceptable offer, but it did not seem to make a difference.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 8

I decided to split the reward fairly overall. On the last round I gave myself one more coin for not abusing the power throughout the game.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 9

I tried to encourage my partner to do an even 50/50 split. If my partner decided to give me anything below 4 coins, I would reject it. Even though it is not as optimal as a 50/50 split, I would accept 4 coins if offered because 4 coins are better than none.

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 10

I feel like it was a decision of how much can i offer and keep , lottery type odds game , trying to see how much i can gain with outgiving up so much of what i have

Strategy open answer

Treatment: constant

Batch: batch-0616

Participant ID: 11

I accepted every offer because it would benefit myself, but also my partner. My priority would be keeping them happy so they make more fair proposals.

Strategy open answer

Batch: batch-0617

Participant ID: 5

i accepted all offers that were equa;

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 6

I wanted to maximize the amount of coins so I tried to see what they would accept.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 7

Split the coins evenly so it is accepted

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 8

I started by proposing a larger number of coins for my partner than myself. Then I proposed a way to even it out and my partner was agreeable, so I moved forward with splitting things evenly. My partner only seemed to reject when I offered significantly less (2 coins, and then towards the end less), but was for the most part agreeable about us remaining at the same amounts.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 9

I tried making as much as i could. I would offer as low as i could.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 10

i tried to give myself a little extra

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 11

My strategy was simply to accept fair offers while not needing to have the most coins but to keep it relatively equal.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 12

First I started the game where I offered the opponent half of the coins. The partner accepted. I then went one coin lower. The partner accepted. I tried to go another coin lower and the partner rejected; therefore, I went back to half the coins being separated.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 13

I wanted to be as equitable as possible. Me and my partner needed to build trust. It was advantageous to split it down the middle so they would approve and we would both profit.

(no response)

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 15

I accepted all of the proposed offers because they were all equal and fair.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 16

A fifty fifty split seemed equitable and fair as well as likely to be accepted. Once it was accepted I continued the fifty fifty split.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 17

no strategy

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 18

If I felt that my partner was trying to take more coins for themselves, I rejected the offer. Otherwise, I accepted the offer mostly only at 5 coins.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 22

the strategy of the game is to divvy up coins between two people. The distribution does not need to be equal. you can accept or reject the offer of coins, if rejected neither get the allotted coins

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 24

The player seemed to reject anything lower than 4, so I stayed with that bare minimum because it would give me profit. Towards the end they were rejecting 4 and lower so I stayed with 5 and tied the rest of the rounds.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 29

I tested what the lower bound on what they would accept was and tried to establish when the mostly would accept. But i think they got greedy later in the game and I had to up my minimum.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 30

terrible

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 31

I decided to share half of the proceeds in every round. I did this because I figured it would be the most fair.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 32

If my partner gave atleast 5 coins I would always accept, and they did for every round in order to split earnings.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 33

At first, I was just accepting the coins because I was trusting of the partner to be fair. Once I realized that they were giving me way less coins than they were collecting, I realized that I needed to start rejecting their low offers in order to get them to give me more coins and ultimately benefit them. I feel like I almost managed to even out our earnings, despite still getting less, which felt ore fair.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 34

My strategy was picking different task I feel comfortable on picking. I wanted to balance it out for me and my partner and play fair when making a decision.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 35

I wanted to be fair to my partner but at the same time I didn't want my partner to take advantage of me. Luckily, I had a partner who was extremely fair to me and offered to split each pile of coins evenly between the two of us, so I was happy to accept each offer.

Strategy open answer

Treatment: constant

Batch: batch-0617

Participant ID: 36

half to me half to the other.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 2

Testing the behavior of the other participant first by going half and half. Afterwards if half is not acceptable and anything above that for me is rejected then I have determined the only way to get coins is to deny myself most of them.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 4

I rejected any low offers, then occasionally took an offer at a lower end. However, most of the time I waited till I was offered 7 or more coins

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 6

My strategy was to accept reasonable amount from the partner but wanted to show rejection early so that his behavior can be curved

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 9

Start with offering half, then see how much lower I could get away with while still being accepted. I kept on after I found equilibrium.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 11

(no response)

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 12

To maximize my money. I accepted everything since he offered 5 each time

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 13

My strategy was to just split the difference equally with my partner for every single exchange. If I were on the other side, I know I'd reject any proposal where the proposer is keeping more than half of the money. So out of fairness to both my partner and myself, I figured a perfect 50-50 split made the most sense.

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 14

I was considering that I would accept most anything except extremely lowballed offers like 1.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 15

Better to take what I was offered rather than nothing

Strategy open answer

Treatment: constant

Batch: batch-061901

If the offer felt even/fair, I accepted it. If the offer was too low, I rejected it.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 38

I rejected unequal distributions which encouraged the other player to only offer equal distribution

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 39

At first I didn't accept offers to let my partner know I also had control. Then I accepted most offers.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 40

I made sure I gave out a reasonable amount to be accepted by my partner

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 41

Honestly I tried to play around with the amounts but the only one that my partner would accept was 5/5

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 43

My partner tried an imbalanced offer at the start which I did not accept. From then on they kept it even. I considered rejecting the offer near the end to come out ahead but decided to keep things balanced for the both of us.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 44

there was no indication of who owned the coins, so I was pretty happy to receive any amount of coins except for zero because I felt that if I was playing, the other player should share at least something.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 45

I tried to find the floor that the other person would accept. Once found, I maintained that floor so I could make as much as possible without risking an offer rejection.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 48

I rejected when the number of coins was 3. I accepted the offer of 4 coins since I assumed the other person wouldn't be willing to be more cooperative than that

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 49

My strategy was to maximize the amount of coins I get, without being rejected by my partner.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 50

just split it equally to maximize offer acceptance

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 51

Started off playing it safe with a 50/50 split, then tried to maximize outcome by trying to gain more coins on some rounds, once I gauged my partner was unlikely to accept anything other than a 50/50 split I kept this for the remaining rounds.

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 52

none

Strategy open answer

Treatment: constant

Batch: batch-061901

I wanted to keep everything fair and even. And it seems my partner did as well.

Strategy open answer

Treatment: constant
Batch: batch-061901
Participant ID: 54

I accepted the offer always because it was fair. My partner was very kind and split the coins with me each round.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 55

I simply went with the fairest method of splitting it equally each time. It went extremely smoothly because of this as the person I was partnered with was entirely cooperative because it was mutually good deal.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 56

At first I was ok with receiving less than 5 coins but then I wanted us to share equally, then I wanted more than 5 for a few so I could catch up to them. When they offered 6 I didn't think that was enough and rejected it and they never went above 5 again. So I just figured that we could both stay at a standstill then.

Strategy open answer

Treatment: constant

Batch: batch-061901

Participant ID: 58

To earn more began by offering a little and increased bit by bit.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 1

I just wanted us to split it evenly every time.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 2

I started by offering the lowest amount I could. When my partner did not accept the offers I offered one more each round. My partner accepted evenly split offers so I stuck with that for the rest of the rounds.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 3

I just wanted to be fair and split the coins evenly every time. I also thought if I did any less than half, they might reject the proposal in order to encourage me to give more in future rounds.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 4

I accepted all offers that were generous and I would have accepted less to make our scores more equal if necessary.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 5

i would accept anything to keep the game going increasing bonus even if my partner were not fair.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 6

Only accepted 5 coins or more usually. Then i realized this probably was deceptive i started accepting lower amounts.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 7

Well I really was just trying to make my partner rich, I saw that they accepted 5 as a trade but I pushed it up to 9 at some points just to see them receive more! I imagine that made them happy!

Participant ID: 39

I was aiming to get the biggest payout as possible, so I rejected lowball offers.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 40

I was not able to make an offer, only to respond. My partner was generous enough to keep sharing half of his coins with me, I couldnt wish for better.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 41

I tried to be fair. I know I missed a few and went up one or down.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 42

I started out by offering half through most of the first turns. Then I started pulling back 1 coin a few times to see if the other person would take 4 coins and they did for a bit. They started rejecting 4 coins so I went back to 5 but I tried 4 and 3 a few times to see if there was any change.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 43

My strategy was to collect as many coins as possible. I was grateful my partner made great decisions as well.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 44

I tried to get the most coins. I tried to be fair after a few rejections. I eventually gave up and just went with the rejections.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 45

Once I found the pattern, I simply made sure I stayed ahead of my partner since I thought my goal was to beat him. I succeeded.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 46

I accepted all reasonable offers. Since it was about accumulating as many coins as possible, I was willing to accept every offer since if rejected, no coins are received.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 47

I decided to split the coins 50/50 each time for two reasons. One reason is that I felt that was a fair split. The second reason is that I didn't want my proposal to be rejected.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 48

I tried to be as fair as possible, splitting it 50/50-ish as much as I could.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 49

I pretty much refused anything less than 4 coins, and even sometimes refused 4 coins on principle. I wanted my partner to be fair and to split the coins as evenly as possible. I was fine occasionally giving in, if I noticed my partner occasionally would give me more coins than themselves.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 50

It started as an even split which was great, then the person got greedy and went down to offering 4. I guess I didnt think too much of it and accepted those. I rejected it when they went to 3. If I would have thought about it, I would have rejected the first time they went to 4 to make them go back up to five, but that didnt occure to me till it was too late.

Strategy open answer

Treatment: constant

Batch: batch-061902

Participant ID: 51

My strategy was to make fair shares so that my partner would accept my proposition. I started off testing what they were fine with, and it seemed that they were only going to be fine with 50/50 so I went with that.

Strategy open answer

Treatment: constant
Batch: batch-061902
Participant ID: 52

i wanted the outcome to be as fair as possible. However, at the same time, I wanted to make as much money as possible for myself.

Strategy open answer

Treatment: constant

I decided to always offer half. My theory was it makes more sense for us to both walk away with half and builds trust. I would rather us both walk away with the same than one of us with nothing.

Strategy open answer

Treatment: random

Batch: batch-061702

Participant ID: 14

I started off going half and half but when i noticed my partner offering more, i also offered more on my turn

Strategy open answer

Treatment: random
Batch: batch-061702
Participant ID: 15

I would keep offering 5 coins as long as my partner did the same.

Strategy open answer

Treatment: random

Batch: batch-061702

Participant ID: 16

I wanted to be generous and give my partner higher offers (so at least 7-10 coins per round) in hoping they would do the same.

Strategy open answer

Treatment: random

Batch: batch-061702

Participant ID: 17

My strategy was to evenly split the coins. If the other person didn't i would match what they put until they sent an even amount.

Strategy open answer

Treatment: random

Batch: batch-061702

Participant ID: 18

I think me and the other person both agreed nonverbally to split the coins. Because turns swapped, it was in our best interest to be fair to one another. That said, you gain nothing by rejecting the coins so by principle you kinda needed to accept things. That said, because we both get turns, I felt that being relatively equal (usually offering half of the coins) was in the best interest of both of us.

Strategy open answer

Treatment: random

Batch: batch-061702

Participant ID: 19

I realized once I was ahead, if I rejected anything that did not benefit me, the rounds would continue and eventually I would win.

Strategy open answer

Treatment: random

Participant ID: 33

(no response)

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 34

The goal was to not time out and to receive the most coins possible, my strategy was to split the coins 50/50 every time that way there was an equal split resulting in a higher chance of acceptance from my teammate. This way, we both win!

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 35

I split it 50-50 as that was the most mutually beneficial choice.

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 36

I always offered 5 because that gave both me and my partner the ability to make the most coins

Strategy open answer

Treatment: random

Batch: batch-0618

Participant ID: 37

No strategy - followed opponent's lead by keeping it split by half then increased by one but partner mirrored same ending up together so last round offered all to see if they would accept or reject, out of curiosity.

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 38

I intended to maximize my coins so I planned to generally accept the offer by my partner. I also tried to see how much I could push it by offering them less coins, until they rejected, in which I then continued with the maximum they'd let me keep while still accepting.

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 39

Since there was a timeout, I wanted to make a fair offer that the responder can accept immediately. I rejected one offer for 3 coins and the responder kept offering me 4 coins, which I kept accepting. I thought receiving some coin is better than not receiving any coin, so I just took 4 coins when it was offered.

Strategy open answer

Treatment: random

Batch: batch-0618

Participant ID: 40

I tried maximizing my points without having my proposal rejected

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 41

I wanted to be fair so I split up the coin offerings and tried to match my partner if they raised or lowered it. My partner seemed to respond in kind and they even gave me larger offerings near the end of the experiment.

Strategy open answer

Treatment: random

Batch: batch-0618

Participant ID: 42

I tried to be as fair as possible with an even split at 5. If my partner submitted a low offer of 3 and under I rejected it as I thought that it was an unfair offer.

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 43

I just tried to be fair. It's no more complex than that.

Strategy open answer

Treatment: random

Batch: batch-0618

Participant ID: 44

I just wanted to match the amount of coins i was given to make sure it evened out

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 46

At first I gave 6 coins and they accepted. From there on out, we each proposed an even split, with one round they gave me only 4 coins so we'd break even. I kept playing to be fair at that point.

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 48

I wanted to give my assigned partner as many coins as possible. I wanted to be generous, as they were generous with me!

Strategy open answer

Treatment: random
Batch: batch-0618
Participant ID: 49

the strategy was try to make it fair, and equal towards the other participant, if they give me a decent amount of coins, than I'll give them a decent a mount of money back too

Strategy open answer

Treatment: random
